

Product Description

Poppet type design for low leakage

Durable aluminum construction of ball, collar, and flange

Injection molded black nozzle and poppet

1.06 inch inside diameter nozzle

Smooth nozzle grip

Mounting nut type installation

The AV4071 poppet type air valve is designed to provide high air flow volumes at low duct pressures and has minimal leakage in the closed position. The air valve is well suited for passenger cabin and crew area installations. The nozzle is provided in black plastic to reduce condensation and weight.
