

Product Description

Long life replaceable LED module

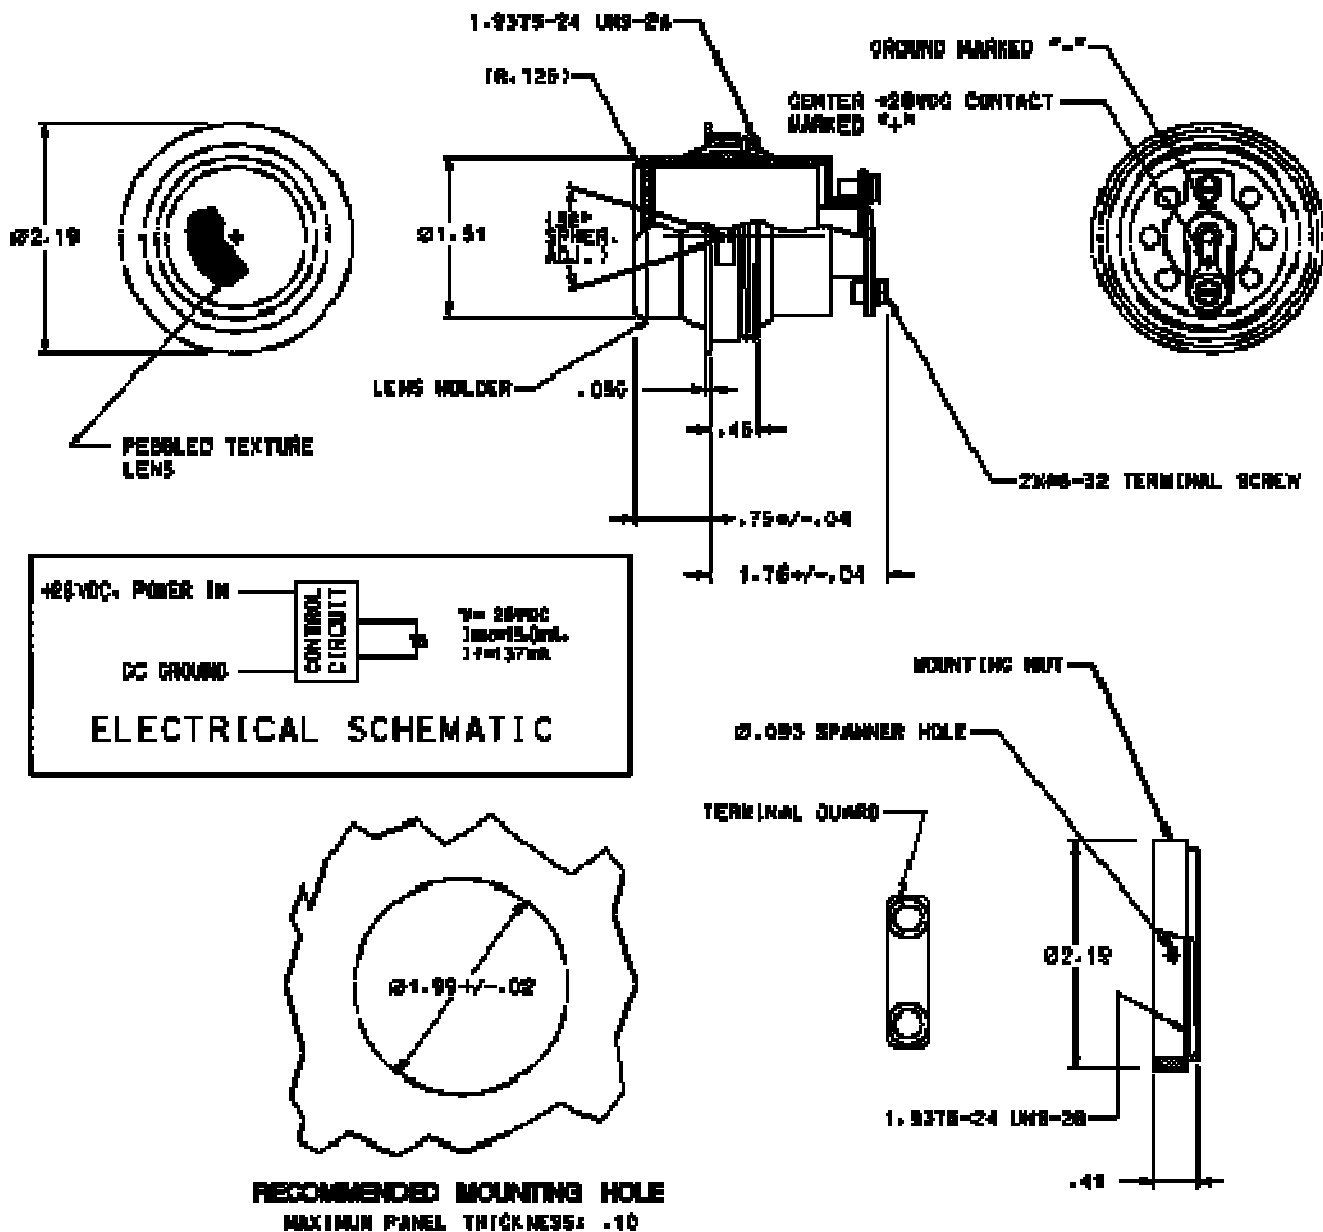

Operates on 28V DC

Light weight aluminum construction

Low heat and current draw

Custom plating available

Mounting nut type installation

The RL6979 LED type reading light is designed for main cabin areas on general aviation aircraft. A long life LED lamp module is used in the assembly which provides low heat generation and current draw. The LED color is available in cool and warm white color temperatures. The reading light is provided with screw terminals for interface to the aircraft wiring systems and an elastomer terminal guard for terminal protection. A mounting nut is also provided for installation.
